

“Simplifying Plein Air” Workshop with Amanda Lovett

This workshop is part of the 2nd Annual Sautee Plein Air Painting Experience
hosted by Skylake Galleries and the Sautee Nacoochee Cultural Center

AMANDA LOVETT

One major issue with Plein Air painting is its overwhelming nature. Well, check your anxiety at the door! We will explore simplified techniques for capturing your composition, light envelope and color. Improve your color mixing skills by using a minimum palette and develop a better understanding of color harmonies.

This workshop has quick demonstrations with easy to understand techniques, after which, artists will concentrate on their own paintings with plenty of personal instruction. No matter if your goal is to create finished paintings, or simply gather information for your studio work, there is no greater way to grow as an artist than to learn how to capture what is actually in front of you!
